### **LEGO® Robot Donation to Benefit Disabled Students**

*KTEC Assistant Principal Presents Denver Speech Pathologist Needed Technology*

**Kenosha, WI:** Yesterday, Scott Hodges, assistant principal at Kenosha School of Technology Enhanced Curriculum (KTEC), presented Denver speech pathologist, Gretchen Storm with a donated LEGO® EV3 robot. Ms. Storm reached out to her friend, Mr. Hodges, who is a LEGO® Education Ambassador. She explained her plan to use the LEGO® robots with her cognitively and physically disabled students, but had limited funds. Mr. Hodges reached out to LEGO® Education and in a collaborative effort between LEGO® Education and KTEC, arranged for a free EV3 for Gretchen and her students.

“We use EV3s at KTEC and Gretchen was explaining how using eye and head movements allows her impaired students to manipulate the robots to do simple tasks and programing. Price was an issue for her and I knew I had to make this happen,” said Mr. Hodges.

**About Your Company:** Kenosha School of Technology Enhanced Curriculum is a prekindergarten through grade 8 public charter school in Kenosha, Wisconsin. LEGO® Robotics is a part of our curriculum school wide. Assistant Principal Scott Hodges is a LEGO® Education Ambassador and travels the country training educators in LEGO® Education programs.
