

KTEC ENGINEERING FAIR THURSDAY MAY 24

We are seeking judges for our Middle-School Engineering Fair:

By the time you meet them at the fair, student partners will have spent more than six weeks using a *Six-Step Design Process* and an online CAD tool or virtual simulation to develop a 3-dimensional project and prototype. Each grade has its own designated project assignment.

As judges, you will use a rubric to rate them on their use of the Design Process and ability to communicate about their process and project with you. An important aspect of the learning experience is the feedback you will give them, both as positive comments and areas in need of improvement during your five to ten minute critique. That's why we need your expertise!

Judging will take place between 8:15am and 3:00pm. You are welcome to stay for the entire day, or for the amount of time your schedule allows.

We will provide both breakfast and lunch and any pre-judging training you may need. Please join us in giving our students a professional engineering experience with your valued feedback!

Please contact: Kristen Kief by May 4, 2018 if you can assist us.

Thank you for your consideration!

Kristen Kief
